

ERC/ Grounds Report November 2017

Our recent ERC mufti raised \$800 towards an irrigation system for the Bush Patch. Thanks so much to the school community for their support.

Mrs Van't Wel is happy to work on the memorial garden with me (and any other interested parents). At this stage Joanna who had volunteered to help is busy with other things and can no longer be involved so any other parents with green thumbs or community members with ideas to contribute would be welcome.

.
At this stage Mrs Van't Wel won't have any time to start this project until the holidays though. She would also need funds approved by the P&C for the purchasing of plants if possible prior to holidays please.

We are happy to liase with a horticulturist and further with Deb Deitz regarding the plants to go into the garden.

The Bush Patch is growing well. We had a small harvest two weeks ago and hopefully will have more things ready to harvest before the end of the year.

We are in real need of more shredded paper for our compost (please leave near the dry mulch bins) and are always looking for parents who would like to assist in the garden.

Thanks to the student ERC members, composting has been successful this year. This will finish up for the year next week.

I have not got any further with contacting the organiser of Bush Link to come our and visit the school. Maybe we can revisit this early next year?
