

## **Multiculturalism (what does it mean to you)**

**It's everywhere. You can't see it, you can't touch it, you can't breathe it or taste it but it is there. It is the glue that joins the world together and makes us united. It is not a rule or a custom but a tradition. For me it is the purified definition of respect. What is it?**

**Multiculturalism! It's not an action but a response.**

**Earth what a perfect but incomplete example of what multiculturalism is. We share the Earth, we help it but do we RESPECT the great pleasure of being able to come together as one planet and not hundreds of different groups and countries? No. What have humans been doing since their existence? Fighting for their way, their rules and their way of life. This is not multiculturalism but remember the only way we can have a perfect world is if us humans learn from their mistakes.**

**The only reason that Earth is becoming such a multicultural place is because most of us are learning from our mistakes. It is not a complete society because not all countries have learnt from their mistakes. I say once we all know, respect and acknowledge our rights we can all unite and lead the way for the future.**
